

Thursday, December 7th, 2017, 9.10 - 13.00

**5th Left Main Summit
at the 18th New Frontiers in Interventional Cardiology 2017**

Venue:

International Conferencing and Entertainment (ICE)
17 Marii Konopnickiej Street, Krakow, Poland

RED ROOM GROUND FLOOR

Directors:

Dariusz Dudek (Krakow, Poland)
Jacek Legutko (Krakow, Poland)

9.10-11.00

Session 1 - State-of-the-art in Left Main PCI 2018

Moderators: Dariusz Dudek, Jacek Legutko

Panel: Goran Stankovic, Pascal Meier, Andrejs Erglis, Davide Capodanno, Zoltan Ruzsa, Ota Hlinomaz, Robert Gil, Sławomir Dobrzycki, Bogusław Kapelak, Konstantinos Toutozas, Marek Deja, Wojciech Zajdel

9.10-10.00

Recorded cases: step-by-step of IVUS-guided Left Main PCI Through Radial Approach

Part I

Cases presentation and heart team discussion

Key points to be discussed:

- Patients and lesions selection for Left Main PCI and CABG - Heart Team approach.
- Radial and femoral approach for Left Main PCI.
- Provisional stenting and complex technique for distal Left Main bifurcation.
- Optimal imaging for Left Main PCI: ANGIO vs. IVUS vs. OCT
- Lesion preparation before stent implantation
- Device selection for Left Main PCI: guide catheter, coronary wires, stents and balloons
- Criteria for optimal Left Main PCI: ANGIO vs. IVUS vs. OCT

Part II

Recorded case 1

IVUS-guided ostial LAD PCI

University Hospital, Krakow, Poland

Operators: Paweł Kleczyński, Artur Dziewierz, Dariusz Dudek

Recorded case 2

FFR/iFR and IVUS-guided LM PCI

University Hospital, Krakow, Poland

Operators: Paweł Kleczyński

10.00-11.00

State-of-the-art in Left Main Revascularization 2018

Davide Capodanno

Critical Appraisal of Clinical Data for Left Main PCI versus CABG

Jacek Legutko

Intravascular Imaging for Left Main Assessment and PCI-guidance

Andrejs Erglis

Optimal Lesion Preparation for Left Main PCI

Goran Stankovic

Single or Complex Stent strategy? An update from European Bifurcation Club for 2018

Robert Gil

Stent selection for Left Main PCI – is there any need for dedicated devices?

11.00-13.00

Session 2 - Left Main PCI in everyday clinical practice

Moderators: Dariusz Dudek, Jacek Legutko

Panel: Pascal Meier, Goran Stankovic, Stanisław Bartuś, Zoltan Ruzsa, Ota Hlinomaz, Robert Gil, Sławomir Dobrzycki, Bogusław Kapelak, Konstantinos Toutouzas, Marek Deja, Oleg Polonetsky

11.00-12.00

Live case: step-by-step of IVUS-guided Left Main PCI Through Radial Approach

Part I

Case presentation from the meeting venue and heart team discussion

Key points to be discussed:

- Patients and lesions selection for Left Main PCI and CABG - Heart Team approach.
- Radial and femoral approach for Left Main PCI.
- Provisional stenting and complex technique for distal Left Main bifurcation.
- Optimal imaging for Left Main PCI: ANGIO vs. IVUS vs. OCT
- Lesion preparation before stent implantation
- Device selection for Left Main PCI: guide catheter, coronary wires, stents and balloons
- Criteria for optimal Left Main PCI: ANGIO vs. IVUS vs. OCT

Part II

Live case from the cathlab

University Hospital, Krakow, Poland

Operators: Maciej Lesiak, Paweł Kleczyński

12.00-13.00

Left main PCI: my best case or worst complication.

Jerzy Sacha

Left Main PCI without contrast administration

Rafał Sztembis

Emergency Left Main PCI in patient after TAVI

Stanisław Bartuś

Complex PCI of severely calcified distal LM bifurcation with rotational atherectomy and DK-Crush technique.

Oleg Polonetsky

Emergency stenting of LM after failed CABG (role of the heart-team in decision-making)

Jacek Legutko

Left Main Summit 2017 Summary and Take-home Messages
