

Thursday, December 7th, 2017, 8:30 – 13:00

**10th European Interventional Cardiology
Fellows Course
at the 18th New Frontiers in Interventional Cardiology workshop
2017**

by Jagiellonian University Medical College in Krakow, Poland

in scientific cooperation with:

**European Association of Percutaneous Cardiovascular Interventions (EAPCI ESC)
Association of Cardiovascular Interventions of the Polish Cardiac Society (AISN PTK)**

Course Directors:

Dariusz Dudek, Chair of EAPCI ESC Education and Training Committee
Jacek Legutko, Past-President of ACVI PCS
Stanisław Bartuś, President-elect of ACVI PCS
Zbigniew Siudak, NFIC Co-Director
Radosław Parma, EAPCI Young Ambassador for Poland

Venue:

International Conferencing and Entertainment (ICE)
17 Marii Konopnickiej Street, Krakow, Poland

YELLOW ROOM 3RD FLOOR

08:30 - 08:35

Welcome and Course Objectives

Dariusz Dudek (Poland)

08:35 – 09:30

CATH LAB 101: THE BASICS

Moderators: Gabor Toth, Oleg Polonetsky

08:35 - 08:50

Piotr Pieniążek

Contrast induced acute kidney injury (AKI) – predictors, prevention and treatment

08:50 - 09:00

Paweł Kralisz

Radiation safety in the cathlab

09:00 - 09:10

Zoltan Ruzsa

Radial access site tips and tricks and when to switch to femoral approach

09:10 – 09:20

Tomasz Rakowski

Access site hemostasis – what are the complications and therapeutic options?

09:20 - 09:30

Paweł Kleczyński

Diagnostic and guiding catheter selection – radial versus femoral approach

09:30 - 10:45

THE DEVICES

Moderator: Tomasz Roleder, Gabor Toth

09:30 - 09:40

Jarosław Wójcik

Guidewire selection for PCI

09:40 – 09:50

Maciej Lesiak

Lesion and patient specific stent metallic DES selection

09:50 - 10:00

Łukasz Rzeszutko

BVS – what are the current recommendations

10:00 - 10:10

Florim Cuculi

High pressure balloons and lesion preparation

10:10 - 10:20

Adam Sukiennik

Role of rotational atherectomy

10:20 – 10:30

Tomasz Roleder

Optimal stent sizing – role of QCA and IVUS

10:30 – 10:40

Gabor Toth

Physiologic lesion assessment in the cathlab – the basics

10:40 – 10:50

Łukasz Kołtowski

qFR – role in cathlab

10:50 – 11:00

COFFEE BREAK

11:00 – 12:00

PATIENT SUBSETS

Moderator: Leszek Bryniarski, Jarosław Wójcik

11:00 – 11:15

Leszek Bryniarski

CTO – state of the art

11:15 – 11:30

Goran Stankovic

Left main and other bifurcations – state of the art

11:30 - 11:45

Rafał Depukat

Cardiogenic shock: role of PCI, LVAD and hypothermia

11:45 – 12:00

Peter Smits

PCI in patient with AMI and high risk of bleeding complications

12:00 – 13:00

PHARMACOTHERAPY

Moderator: David Moliterno, Artur Dziewierz, Davide Capodanno

12:00 – 12:15

Artur Dziewierz

Pharmacotherapy in STEMI – update from 2017 ESC guidelines

12:15 – 12:30

Davide Capodanno

Optimal duration of DAPT after stent implantation in ACS and stable angina

12:30 - 12:45

David Moliterno

DAPT after stenting in patients on VKA or NOAC treatment

12:45 – 13:00

Dariusz Dudek

EAPCI Certificaton programme

Thursday, December 7th, 2017 17:30 – 20:00

Venue:

International Conferencing and Entertainment (ICE)
17 Marii Konopnickiej Street, Krakow, Poland

RED ROOM GROUND FLOOR

17:30 – 20:00

ADVANCED OPERATOR WORKSHOP FOR FELLOWS

My best case success and/or worst complications in 2017 – **coronary** case review

Moderators: Jacek Legutko, Krzysztof Żmudka

Panel: Konstantinos Toutozas, Goran Stankovic, Andrejs Erglis, Imre Ungi, Lucian Zarma, Tomasz Pawłowski, Aleksander Araszkiwicz, Jarosław Wójcik, Krzysztof Wilczek, Bartłomiej Guzik, Łukasz Rzeszutko, Jacek Bil, Artur Krzywkowski

Grzegorz Kubiak

Stable angina with heavily unstable plaque; Direct stenting-a good solution on everyday life?

Radosław Rychlak

Perforation of the coronary artery during angioplasty.

Krzysztof Ściborski

LAD Stone

Ieva Briede

PCI beyond the CABG

Krzysztof Dyrbuś

(Multi-vessel angioplasty in a patient disqualified from CABG by two cardiac surgery centers)

Viktor Sasi

Antegrade dissection reentry (ADR) after failed rotablation as a bail out alternative

Grzegorz Horszczaruk

An unexpected discrepancy between clinical presentation, coronary angiography, IVUS and FFR

Rafał Sztembis

STEMI ściany przedniej ze spiralną dyssekcją ostium LAD uniemożliwiającą propagację lidera.

Rafał Sztembis

PCI LAD powikłane zsunięciem stentu na granicy 5 i 6 segmentu.

Aleksander Żurkowski

Unusual IVUS LM guided PCI in patient suffering from NSTEMI

Aliaksei Barysevich

Stenting of LM with big ulceration, assessed by OCT

Thursday, December 7th, 2017 17:30 – 20:00

Venue:

International Conferencing and Entertainment (ICE)
17 Marii Konopnickiej Street, Krakow, Poland

YELLOW ROOM 3RD FLOOR

17:30 - 20:00

ADVANCED OPERATOR WORKSHOP FOR FELLOWS

My best case success and/or worst complications in 2017 – **structural heart and peripheral** case review

Moderators: Dariusz Dudek, Stanisław Bartuś

Panel: Pascal Meier, Piotr Pieniążek, Zbigniew Chmielak, Marek Grygier, Marcin Demkow, Piotr Musiałek, Grzegorz Smolka, Marin Demkow, Michał Chyrchel, Wojciech Zajdel

Piotr Wańczura

Asymptomatic dislocation of LAAC device

Jarosław Skowroński

Percutaneous Mitral Balloon Valvuloplasty. Difficult Mitral Valve Crossing

Paweł Latacz

Endovascular mechanical thrombectomy with the use of Aspirex[®]S device as rescue treatment for life-threatening massive thrombosis of the inferior vena cava, iliac and femoral veins in a paediatric patient

Jacek Kuźma

Left pulmonary artery revascularisation in a patient with hypoplastic left heart syndrome

Szymon Darocha

Balloon pulmonary angioplasty in persistent CTEPH after pulmonary endarterectomy – procedure guided by 3D-printed model and 3D visualization of the left pulmonary artery.

Mateusz Kachel

Radiotherapy induced axillary artery stenosis - novel approach in malignant restenosis utilizing Supera stent.

Rafał Januszek

Difficult and atypical patient – different possibilities of coronary arteries revascularization

Marcin Dębiński

Direct implantation of the self-expanding valve prosthesis (TAVI) in the patient with bicuspid anatomy
